

SmartApps Catalog

based on the eXpress corporate communications platform

eXpress SmartApps technology

With SmartApps, it is possible to integrate almost any corporate information system into a single eXpress application, which is faster and cheaper than the development of individual applications.

Standard eXpress

- Chats and channels

Calls

Videoconferencing

Chatbots

Fully managed by enterprise IT

eXpress SmartApps

- User access to corporate services through a flexible set of universal widgets – SmartApps

Inside a single trusted eXpress app without additional authorization

Fast implementation for all Android, iOS, Desktop, Web platforms

Without long and expensive development and approvals with information security

Catalog of smartapps and bots

Provides convenient and fast access to the company's corporate services, regardless of the device used

Examples of services for integration into SmartApps:

360 Assessment, Personal Development Plan

KPI assessment, salary

Corporate portal, project showcase

Social programs, voluntary health insurance

My documents, business trips, meals

Staff adaptation, training

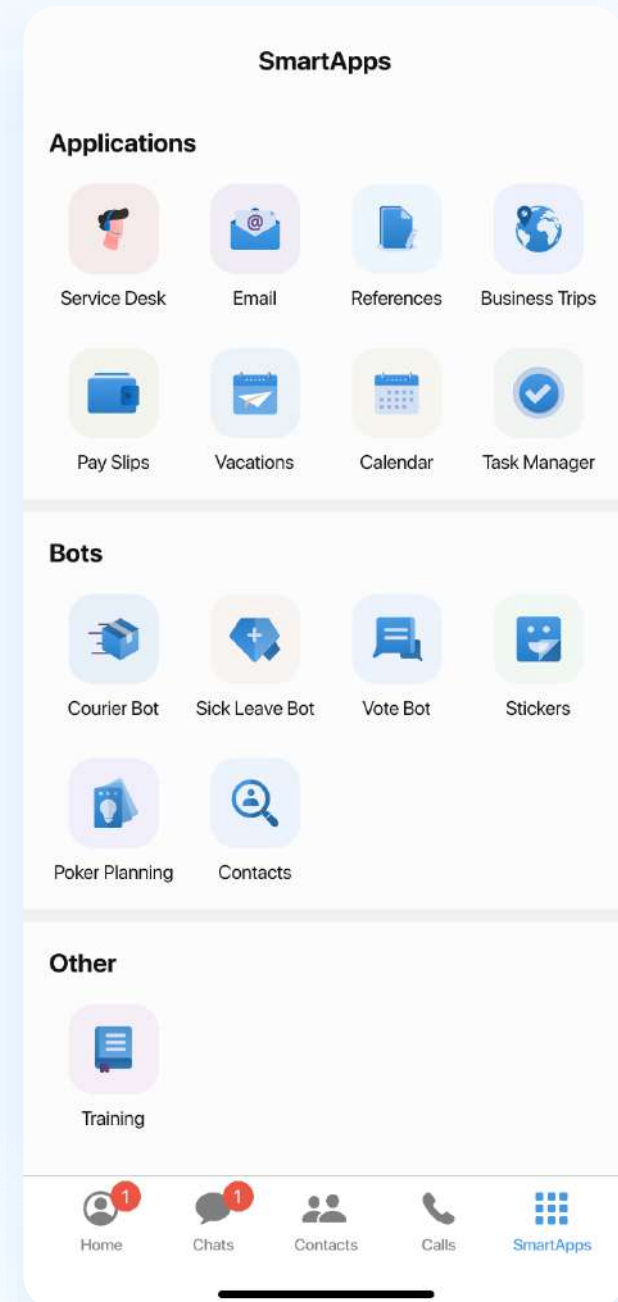

Making an appointment with a doctor, registration of sanatorium-resort treatment

Services for managers

Corporate social network

Category: **All employees**

Business task: Demonstration to users of all SmartApps and bots available in the application

Ready to deploy

Calendar

Fullscreen mode

Schedule at your fingertips

1

Get a list of appointments

Log in and access your meeting schedule

2

Create and customize meetings

The calendar allows you to create and configure meetings, invite participants, and automatically create a conference in eXpress along with the meeting

3

View colleagues' calendars in the meeting grid

You can view your colleagues' calendars if you've been granted access to them

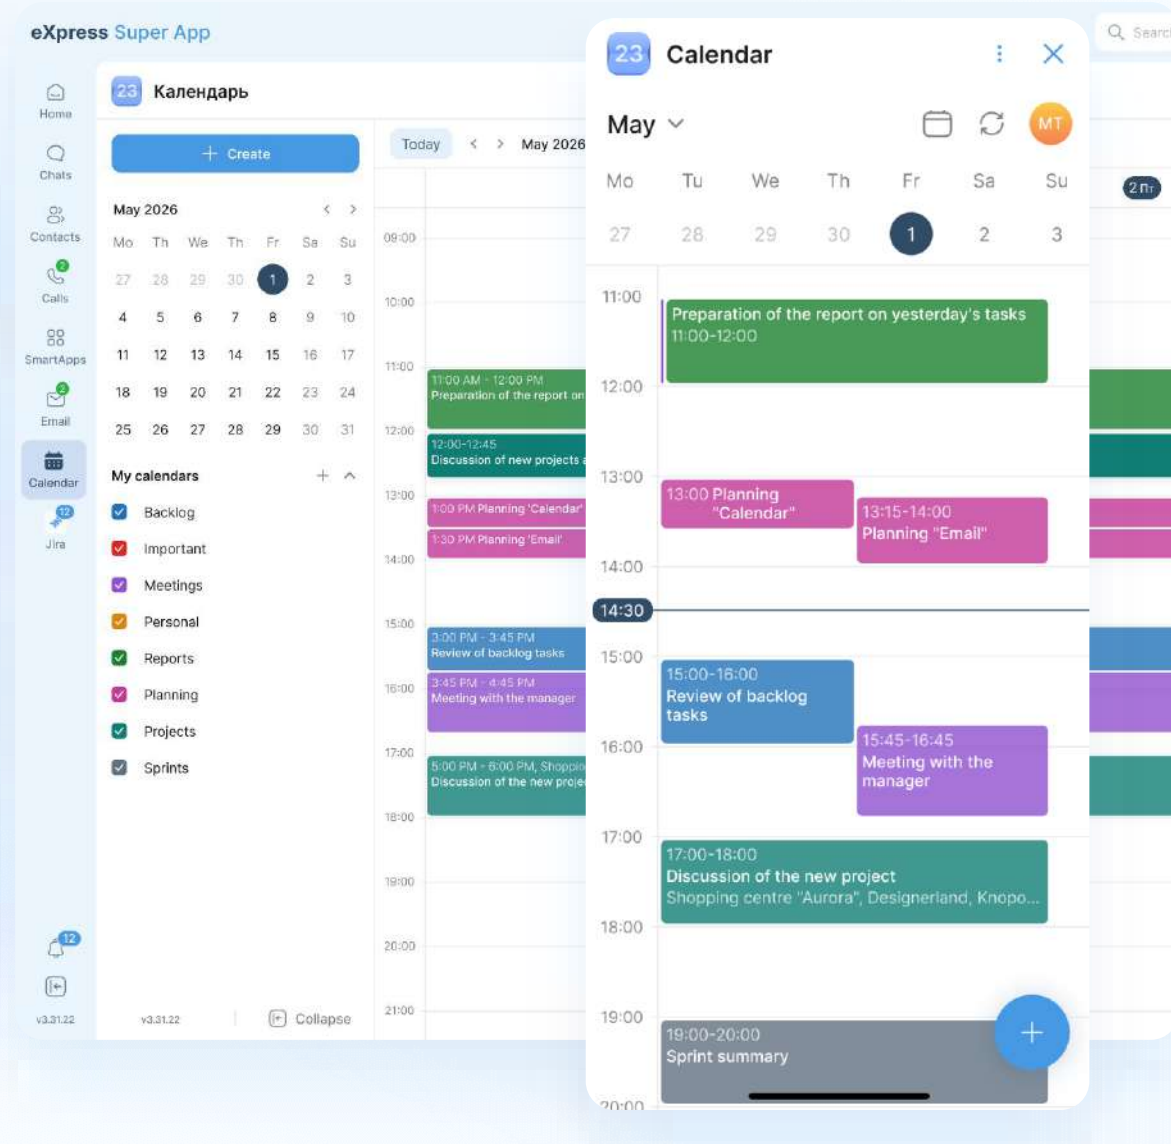

4

Switch between calendars

The user can connect calendars of several services at once and switch between them

Category: All employees

Business task: Maintaining a work calendar in eXpress

Email

Fullscreen mode

Email is always at hand

1

Main features of an email client

View incoming emails, download attachments, send emails directly in the messenger

2

Integration with email services

Get access to your Gmail, Exchange, Yandex, Communigate email accounts or add an account manually with the server address and port

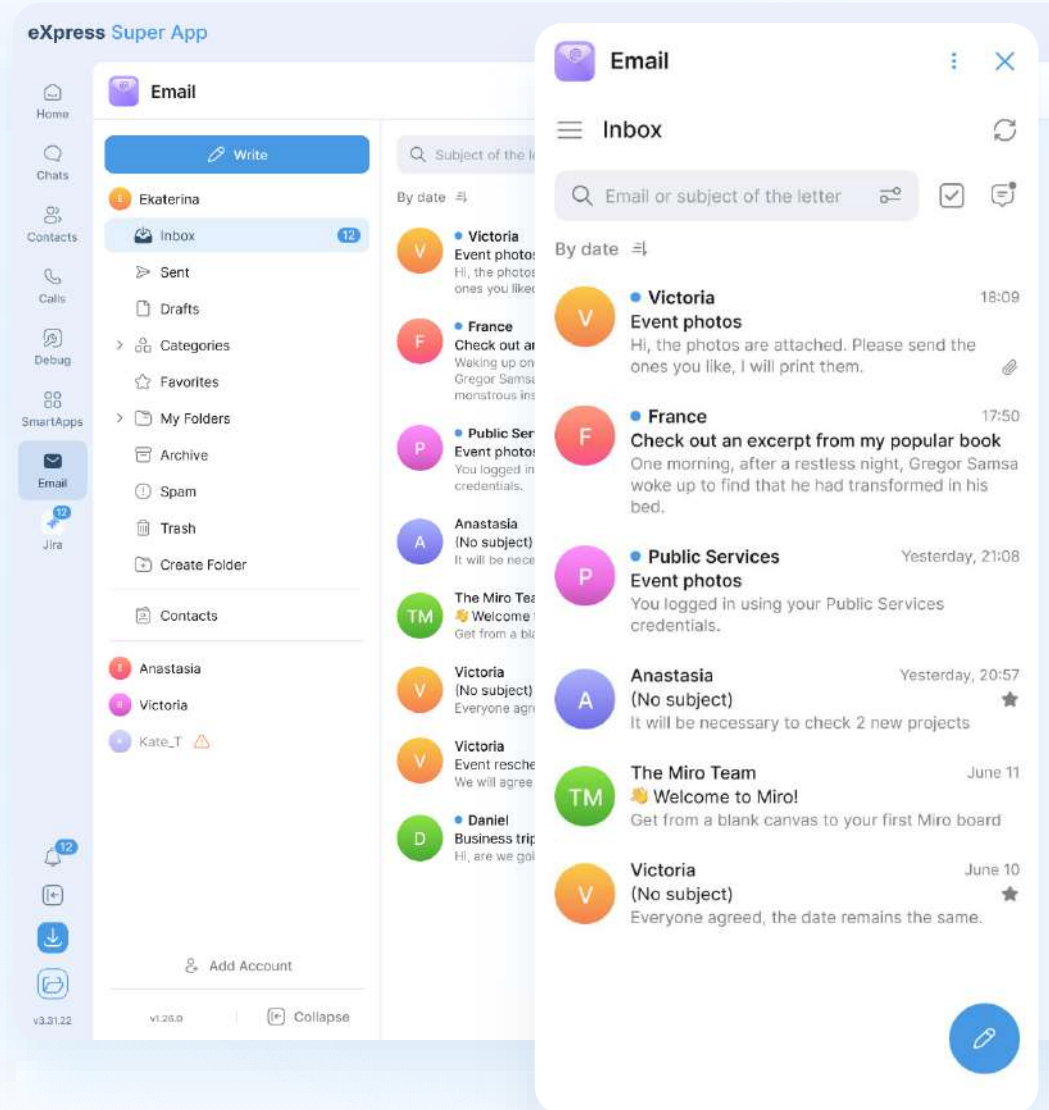

3

Incoming Email Notifications

SmartApp will send you a notification when a new email arrives

Category: All employees

Business task: Email access inside eXpress

Main page

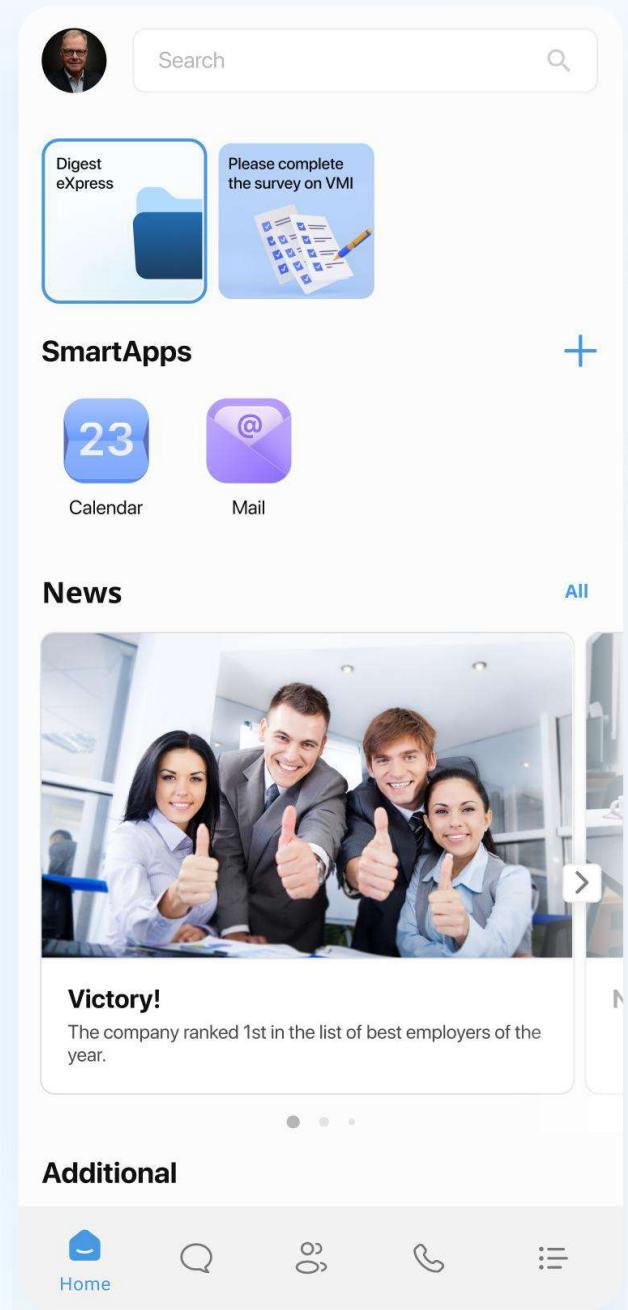

News and Core Corporate Services
on One Page

A SmartApp Home Page can contain:

- 1 Company News Feed
- 2 Announcements of events
- 3 SmartApps catalog with the company's digital services
- 4 Access to the employee's personal profile

Category: All employees

Business task: Quick and easy access to corporate information

Proxy SmartApp v.1

Proxying web resources to the eXpress application

1

Smartapp template with description for implementing proxying of an existing as-is web resource in the "WebView" of the eXpress client

Category: IT Service

Proxy SmartApp v.2

X

1

Dialog for sites with a standard WWW-Authenticate header authorization process

2

Support for custom TLS certificates (CA and intermediate are configured directly in the admin panel)

3

How WebSocket works on websites

4

Support for loading and redirects between multiple proxy web resources on the client

5

Abandoned separate subdomains and TLS certificates for each proxy resource

Task Manager

Create tasks and set due dates for yourself and others

- 1

Create tasks for yourself and your colleagues

Set tasks for yourself and your colleagues. Specify the type, priority, and term. Track status, create subtasks for hierarchy
- 2

Use a dashboard

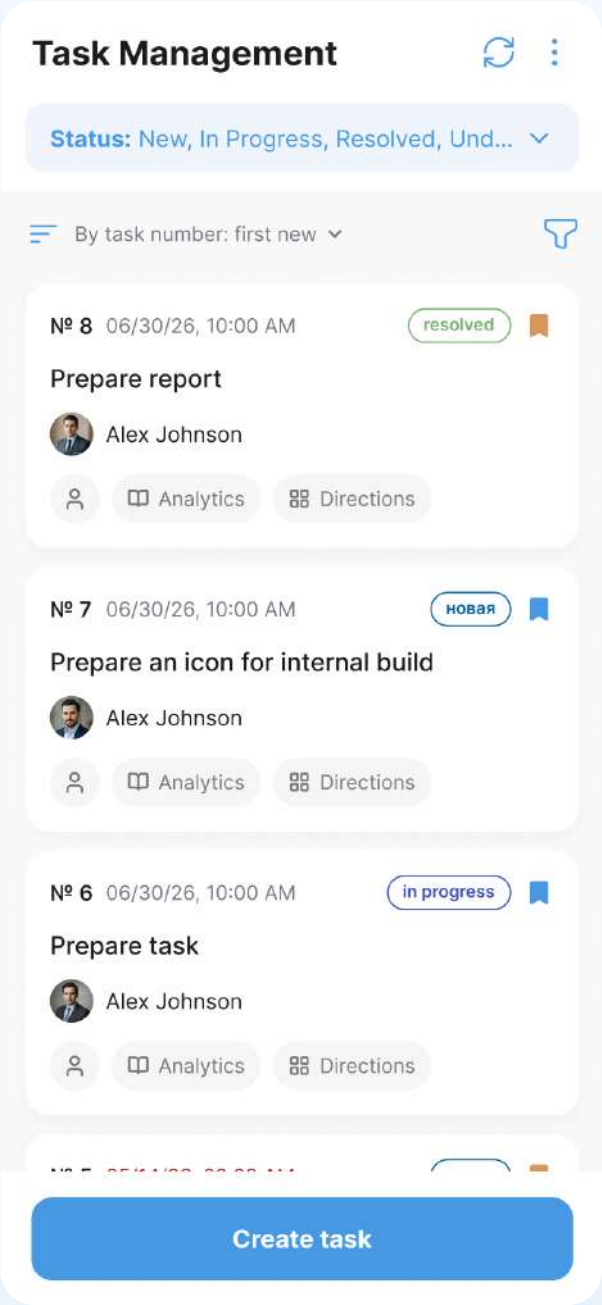

Track statistics on your tasks and assignments from colleagues
- 3

View eXpress Chat Notifications

Get notifications in the Express chat, discuss tasks there and go directly to the task card in Smartapp if necessary

Category: All employees

Business task: Task management

Ideas

Mobile personal account

Single point of entry. Notification center. Everything at your fingertips

Employee's personal account

- All services, bots and tools of the company are on one screen
- Receive notifications from all corporate services in one place
- Company news, employee profile and selected tools are always on the main page

Employee Profile

- Full colleague card. Contacts, job title, hobbies, benefits, and emergency data in one profile
- Culture of recognition. Send thanks to colleagues and share achievements
- Live profile. An employee fills his page with interests, hobbies, and important personal information

References

- Order online. Request accounting certificates (2-NDFL, visa and others) directly from the application
- Registration status. Track the readiness of the certificate without calling the accounting department
- All certificates in one place. Request history and ready-made documents are available at any time

Landing pages

- Corporate pages without development. Create and publish employee information pages
- Attachments, links to services and text content on one page
- Quick publishing. The finished landing page is available to employees immediately after publication

Vacation

- The rest of the days. The current balance of vacation days is always in front of your eyes
- Online scheduling. Apply for leave directly from the app without paper forms
- Vacation history. View all past and upcoming vacation periods

Salary

- Payslip on the phone. View accruals and payout details at any time
- Accrual history. Full chronology of payments without contacting the accounting department
- Transparency of payments. An employee always understands what his income consists of

Category: **All employees**

Business task: Improving work efficiency through automation and acceleration of business and HR processes

Mobile personal account

Single point of entry. Notification center. Everything at your fingertips

1

News

- Company feed. Up-to-date news from corporate channels – right in the app
- Nothing superfluous. Only relevant content from the company's official sources
- Team involvement. Employees are up to date without additional messengers and mailings

2

Training

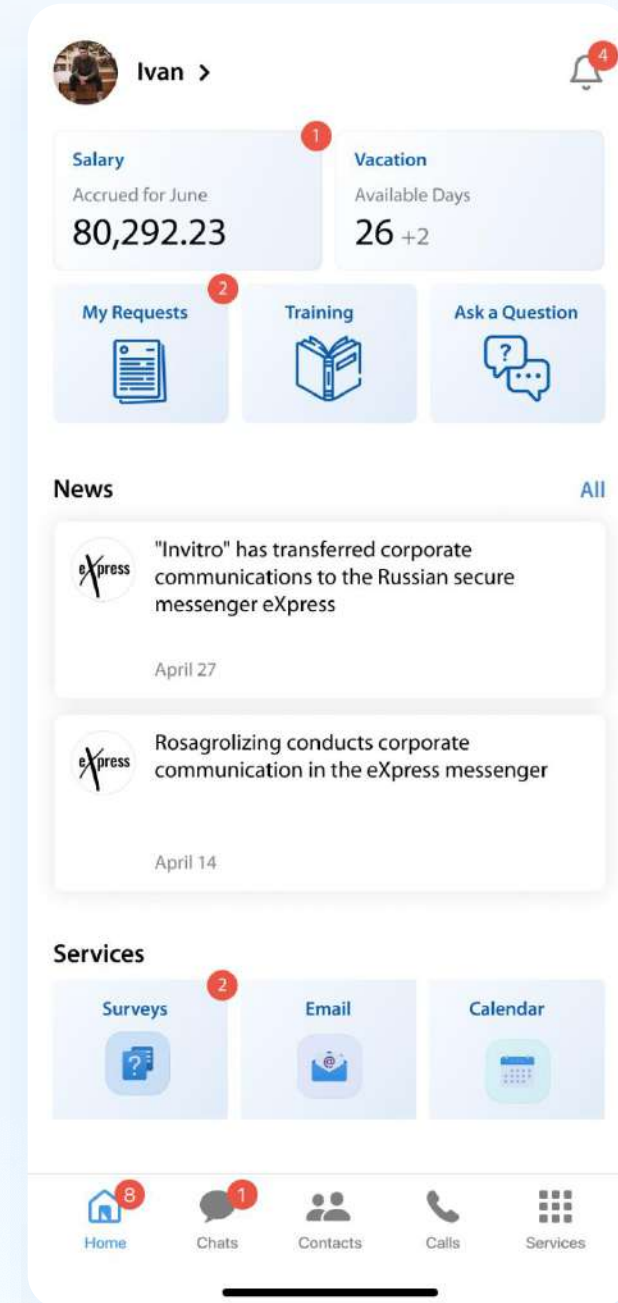

- Materials are always nearby. Educational content is available at any time from a mobile device
- Onboarding in the app. New employees are onboarding without external systems and links
- Unified knowledge base. All courses, instructions and materials in one section

3

Questions

- Direct channel with support. Ask questions to your manager or helpdesk directly from the app
- Integration with the ticket system. The status of the case is updated in real time
- All correspondence is saved and available in the history of requests

Category: All employees

Service Desk

Support is always at hand

1

Create support tickets through an easy-to-use app

SmartApp allows you to conveniently and quickly create support tickets and monitor the status of your tickets

2

Notifications about changes in the status of the application

You will receive a notification from the Service Desk as soon as the status of your case changes

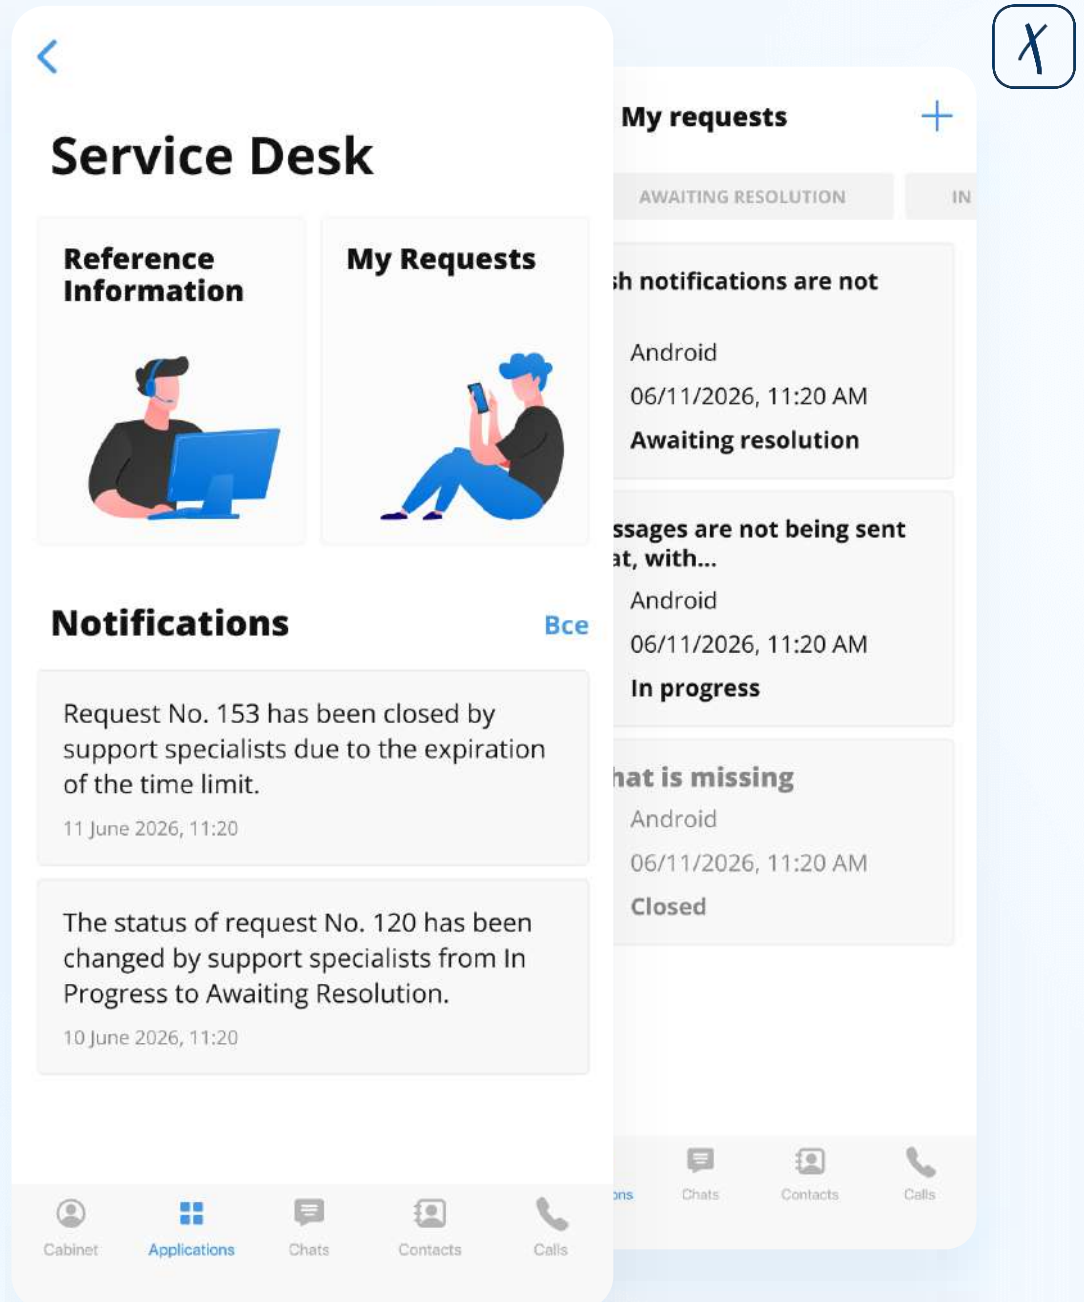

3

Quick access to help information

SmartApp has a help section where you can find links to corporate documents and answers to frequently asked questions

Category: **All employees** **Technical support**

Business task: Automation of interaction with the support service

Questionnaire (option)

Taking a survey in SmartApp and in the web version

1

Manage audience and access

- Working with the organizational structure to set up the desired target audience
- Automatic replay restriction
- Flexible configuration of the visibility of results for respondents
- Assign users with dedicated access to analytics reports/edit a specific survey

2

Working with data

- Monitoring: Track respondents' progress in real time with graphs on the homepage
- Feedback: a separate tab for a detailed study of respondents' answers

3

Question Builder

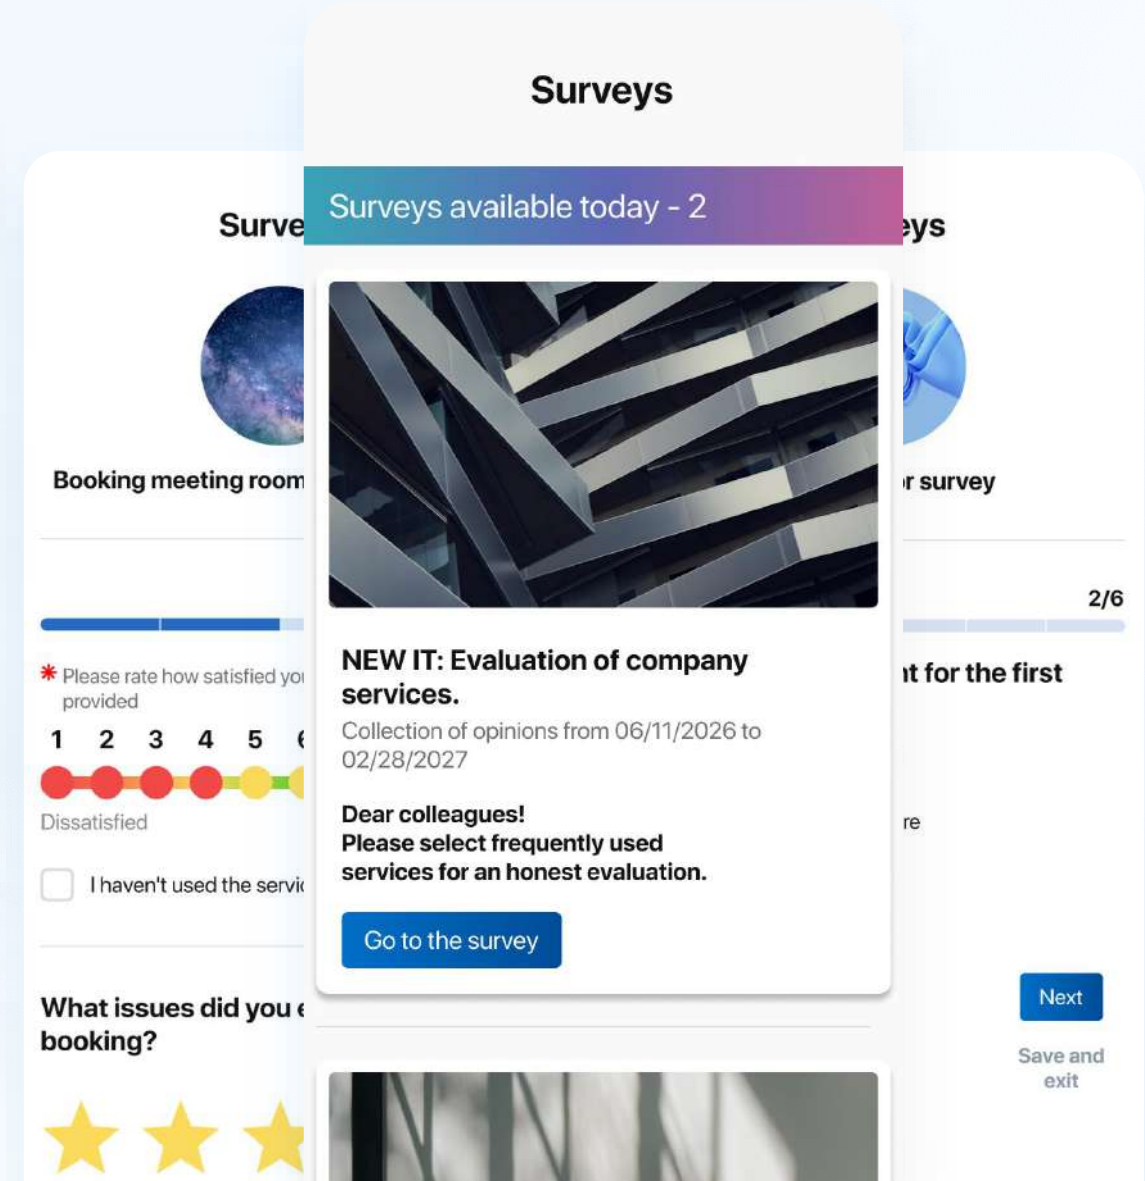

- 8 basic question types with the ability to add images to them and work in a text editor
- Customize survey logic based on user responses (branching)
- Card or page-by-page view of the survey for respondents

4

Manage survey types

- Periodic (permanent): to regularly monitor the dynamics of opinions
- Custom: for a one-time collection of opinions with an arbitrary set of questions and pages

Business task: Create and complete surveys

Document flow

It is easy to approve documents

- 1

Document workflow task list

Stay on top of new document workflow tasks and view your tasks in SmartApp
- 2

Align tasks

Approve and reject incoming tasks, leave comments and sign documents
- 3

Delegate tasks

SmartApp allows you to delegate document management tasks to other employees
